

Section 9 - Lambda Expressions Continued Quiz

1.
What is lazy processing and how is it used in the Java 8 stream API?
2.
Write a few lines of code that will create an ArrayList of integers, open up a stream, filter the numbers so that we only have those less than 50, and then convert the resulting stream to an ArrayList.
3.
Given the GovernmentBuilding class from Section 2, create a bunch of buildings, then group them by agency name.
