

Section 10 - IO Fundamentals and Java Exceptions Quiz

1.
Explain what exceptions are used for and the difference between checked and unchecked exceptions.
2.
Explain why the try-with statement is so useful and the advantages it has over try-finally statements in terms of resource management.
3.
What is deserialization/serialization?
4.
Write some code that will generate 100 random numbers, then write them out to a file. You must use the try-with idiom.
